

Richard Gutierrez

Richard is Programme Management Officer at the Secretariat of the Minamata Convention on Mercury. Richard has over two decades of experience in environmental policy in chemicals and wastes and in project management. He has been working at the forefront of promoting environmental justice starting with the electronic waste issue in 2001 to working with small-scale miners and government officials in the Philippines, Indonesia, Mongolia, and other countries to address mercury pollution from small-scale gold mining. Prior to joining the Minamata Secretariat, Richard was concurrently managing the GEF planetGOLD projects in the Philippines and Mongolia and the Global Affairs Canada supported project on the sustainable development of artisanal and small-scale gold mining project in Indonesia.
